

Acrolon™ 1850

High Build Isocyanate Free Finish

Introducing the next generation in non-isocyanate topcoats; utilising new technology, Acrolon™ 1850 has been principally designed for the offshore and fabric maintenance markets, where the use of isocyanates is restricted, but good coverage is desired with little downtime.

Meeting the need

Acrolon™ 1850 is an isocyanate free coating solution, with high gloss retention properties, for exterior exposed surfaces where retention of gloss is required, and the use of isocyanate products is prohibited or undesirable. With its resistance to water spotting, and good performance against the effects of weathering and UV rays, Acrolon™ 1850 offers a durable coatings solution.

Single coat application

Acrolon™ 1850 has been formulated specifically to achieve full coverage in a single coat by brush, allowing rapid return to service and reduced downtime, making it the product of choice when a quick and easy application is the key to success.

Features

- High build properties
- Durable
- Isocyanate free

Benefits

- Full coverage obtained in a single coat by brush. Can be applied by brush or single-leg airless spray. Reduced costs and downtime.
- Good gloss retention. Good results in UV and weathering performance. Fast resistance to water spotting. Prolongs service life.
- Can be used when isocyanate products are precluded or are undesirable. Preferable towards regulations.

Typical Specifications

Typical offshore fabric maintenance specifications		
System	Product	DFT (µm)
1	Macropoxy™ M922M	300
	Acrolon™ 1850	100-200
2	Dura-Plate™ 301W	250
	Acrolon™ 1850	100-200

The Sherwin-Williams Difference

By putting our customers first, we know that the innovation, imagination, research and development we put into each and every product will be worth it. You are at the centre of our thinking wherever we operate around the world across five continents whether it is advice, specification or on-site inspection. You are the reason we exist. This is the Sherwin-Williams difference.
