

Epidek™ M153

Extra Heavy Duty Deck Coating System

Epidek™ M153 is a hard wearing, tar free, pure epoxy based anti-slip coating designed to provide exceptional wear and impact resistance to deck surfaces, including those which are subject to the most extreme conditions.

Epidek™ M153 offers excellent resistance to crude oil and salt water immersion, and when combined with calcined bauxite aggregate dressing, offers exceptional resistance to abrasion and impact damage. It is a long life system which also demonstrates good resistance to the localised effects of heat, when welding repairs or modifications occur during construction and maintenance, and can be used to level out undulations and fill cracks in steel decks and plates.

Whilst Epidek™ M153 has many uses, it is especially recommended for surfaces requiring a high degree of impact and abrasion resistance, including those where a high level of anti-slip properties need to be retained under conditions of severe crude oil and hydrocarbon contamination.

Features

- Tar free
- Non-sparking aluminium oxide aggregate
- Long pot life and wet edge time
- High impact and abrasion resistance
- Excellent resistance to crude oil and salt water immersion
- Deck levelling capability
- Approvals.

Benefits

- Low smoke emission & reduced health and safety impact
- Increases non-slip properties and greatly extends service life
- Improved mixing and application properties. Excellent adhesion to epoxy primers, tie coats or blast cleaned steel
- Exceptional wear
- Greatly extends service life
- Correct undulations in steel decks or fill cracks between horizontal deck places
- NORSOK
BS.476 Part 7 : Surface spread of flames.

The Sherwin-Williams Difference

By putting our customers first, we know that the innovation, imagination, research and development we put into each and every product will be worth it. You are at the centre of our thinking wherever we operate around the world across five continents whether it is advice, specification or on-site inspection. You are the reason we exist. This is the Sherwin-Williams difference.
