

# London Covered

Protective coatings used across the United Kingdom's capital city

## London... we've got it covered.

Sherwin-Williams protective coating systems are used across a wide variety of iconic buildings and structures within the City of London. Explore how our passive fire protection and anti-corrosion coatings keep the United Kingdom's capital protected.

At Sherwin-Williams, we believe that nothing is impossible. In fact we love a challenge.

That's why major architects, designers and engineers choose us to protect some of the most complex building structures ever undertaken for the financial capital of the world.

Our experts offer an unrivalled, personal service from specification to application, with the support of our global organisation – no matter what the challenge.

Bridges

Commercial Buildings

Leisure & Stadia

Transport

For the landmarks of modern London, there can be no compromise.

Protection you can trust.

Our world-class passive fire protection and anti-corrosion coatings are second-to-none, so when specifying a Sherwin-Williams coatings system, you can be assured that you are selecting a system that has been researched, developed and tested to the highest international standards.

Whether you require a fast drying primer, cellulosic passive fire protection or a chemical resistant coating for an extreme environment, our coatings are designed to protect and extend the service life of your asset.

### Test standards and approvals include:

- UL263
- EN 13381-8
- BS476 Part 20/21
- DIN4102 Part 2
- GOST 53295-2009
- Third party verification under Certifire Scheme
- Audited by British Standards Institution ISO 9001
- Highways Agency approved
- Network Rail approved
- London Underground approved.
