

# Barnsley brewery

## United Kingdom

## Project

The flooring for a major brewery in Barnsley, south Yorkshire, had to retain high levels of impact resistance with heavy kegs being moved about daily.

The requirement was also for high levels of anti-slip resistance where the staff could work in the knowledge that it was safe.

The brewery had a typical production floor area which was steam washed daily and subjected to heavy duty usage with barrels being moved around.

**Substrate:** Concrete.

**Requirements:** To provide high levels of impact resistance and anti-slip resistance.

**Specifications:** Meeting all relevant environmental and health and safety regulations.

**Client:** Barnsley brewery.

## System

The chosen system was Resuthane™ TG69 polyurethane floor screed for its unique surface profile in which operatives can work safely. It is also capable of being used in wet areas, it can be laid to falls allowing water to run away and incorporate drainage.

Resuthane™ TG69 is a very durable floor system. Its high levels of impact resistance, making an ideal solution for heavy duty areas. There are a number of colours available to infuse life into any facility, with Kingfisher Blue chosen for this project.

## The Sherwin-Williams Difference

By putting our customers first, we know that the innovation, imagination, research and development we put into each and every product will be worth it. You are at the centre of our thinking wherever we operate around the world across five continents whether it is advice, specification or on-site inspection. You are the reason we exist. This is the Sherwin-Williams difference.
