

Gate Gourmet

United Kingdom

Project

Gate Gourmet, the world's largest independent provider of catering and provisioning services for airlines and railroads was setting up a new catering unit and required a flooring solution for this demanding environment.

The new Gate Gourmet unit had a very hard concrete sub floor and the 3000 sq metre floor area required a very hard long lasting, seamless, hygienic industrial flooring system appropriate for food manufacture and production.

The concrete sub floor needed thorough preparation, and the area was vacuum-assisted shot blasted to thoroughly clean down the area to create a good key for the flooring.

Substrate: Concrete.

Requirements: To provide a very hard long lasting, seamless, hygienic industrial flooring system.

Specifications: Meeting all relevant environmental and health and safety regulations.

Area coated: 3,000 m².

Client: Gate Gourmet.

System

Arambol architects and surveyors specified Sherwin-Williams' leading polyurethane resin screed product Resuthane™ TG69, a water based polyurethane resin screed ideal for environments with heavy duty usage. It is also resistant to thermal shock, abrasion and chemical attack.

For this requirement, Resuthane™ provided surfaces which are stable to steam cleaning and resistant to boiling water and process liquids up to 100°C. A matt, textured surface was achieved that was both seamless and possessing strong anti-slip properties.

The flooring was tapered down and toed-in along the steel reinforced concrete joints to ensure a seamless finish with as few joints as possible.

The Sherwin-Williams Difference

By putting our customers first, we know that the innovation, imagination, research and development we put into each and every product will be worth it. You are at the centre of our thinking wherever we operate around the world across five continents whether it is advice, specification or on-site inspection. You are the reason we exist. This is the Sherwin-Williams difference.
