

The Bath Priory

United Kingdom

Project

The owners of The Priory restaurant - part of the exclusive Bath Priory Hotel, Restaurant and Spa near the city of Bath - were looking for a long-lasting solution to traditional surface finishes.

They wanted something which was designed specifically to meet the day-to-day pressures of running a busy commercial kitchen which could stand up to hard wearing and was safe for staff working in this area.

Substrate: Concrete.

Requirements: To provide a long-lasting finish which was safe for staff.

Specifications: Meeting all relevant environmental and health and safety regulations.

Client: The Bath Priory.

System

The system specified was Resuthane™ TG69 to provide a safe flooring surface in which the chefs and kitchen staff could work safely with exceptional anti-slip properties, making it ideal for both wet and dry conditions.

The system also provides a finish that is durable and provides high levels of impact resistance, making it a long-term option in comparison to other alternatives.

The system is inherently seamless, meaning there are a number of hygiene advantages from Resuthane™ TG69 which can also be laid to falls and incorporate drainage channels. It has excellent thermal shock capabilities making it an ideal solution for commercial kitchen environments.

The Sherwin-Williams Difference

By putting our customers first, we know that the innovation, imagination, research and development we put into each and every product will be worth it. You are at the centre of our thinking wherever we operate around the world across five continents whether it is advice, specification or on-site inspection. You are the reason we exist. This is the Sherwin-Williams difference.
